

Reference: System Variables

System Variables

There are both system and system date variables in Incorta.

System Variables

Here is a list of the System Variables:

Variable	Data Type	Description
user	string	Returns the loginname value as a string for the current user.

System Date Variables

Here is a list of the System Date Variables:

Variable	Data Type	Description
currentDate	Date	The current date of the Incorta Server time.
currentDay	Date	The current day from the Incorta Server time.
currentMonth	Integer	The month of the current Incorta Server time.
currentYear	Integer	The year of the current Incorta Server time
currentYearStart	Date	The first day of the current year: January, 1st, yyyy (time: 00:00:00.000)
currentMonthStart	Date	The first day of the current Month: January, 1st, yyyy (time: 00:00:00.000)
dayAgo	Date	A date that corresponds to the current hour on a 24 hour clock.
weekAgo	Date	A date exactly seven days before the current date (time: 00:00:00.000)
monthAgo	Date	A date exactly one month before the current date (time: 00:00:00.000)
currentQuarter	Integer	The current quarter from the system time.
quarterAgo	Date	A date exactly one quarter before the current date (time: 00:00:00.000)
yearAgo	Date	A date exactly one year before the current date (time: 00:00:00.000)
lastYear	Integer	The year before the year of the current Unix Time
lastYearStart	Date	The first day of the previous year: January, 1st, yyyy (time: 00:00:00.000)
lastMonthStart	Date	The first day of the previous month, as in: January, 1st, yyyy (time: 00:00:00.000)
